The Photline MX2000-LN series are intensity modulators especially designed for operation in the 2.0 μ m wavelength band at frequencies up to 10 GHz and above.

These Mach-Zehnder modulators offer engineers working at 2.0 μ m the intrinsic and unparalleled benefits of LiNbO₃ external modulation: high bandwidth, high contrast, ease of use.

The MX2000-LN series are based on a X-cut design that confers them an unparalleled stability. They incorporate 2.0 μ m specific waveguide and are pigtailed with 2.0 μ m polarization maintaining fibers.

Absolute Maximum Ratings

Stresses in excess of the absolute maximum ratings can cause permanent damage to the device. These are absolute stress ratings only. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of the data sheet. Exposure to absolute maximum ratings for extended periods can adversely affect device reliability.
