

1.0µm Single Mode Longitudinal (SLM) CW Ytterbium Fiber Laser

KPS-BT2-SLM-YFL and KPS-OEM-SLM-YFL Series

Features

- Saturated output power up to 5W
- Narrow linewidth <100kHz
- Long term stability: <5% over 8 hours at 25°C in APC mode
- Tuning by temperature or piezo control
- Automatic Current Control (ACC)
- Automatic Power Control (APC) up to 4W for non-PM version
- GPIB and RS-232 interface

Designed in a Master Oscillator Power Fiber Amplifier (MOPFA) architecture with a very stable Distributed Feedback fiber laser source. This combines narrow linewidth (< 100kHz) with high output power. An input for error feedback signal is available for external frequency locking.

Applications

- Spectroscopy
- Gas sensing
- Lidar
- Coherent detection
- Non-linear optics
